

# Solving the puzzle of contaminated site law

## **CONTAMINATED SITES LAW&POLICY** DIRECTORY

Available June 2009 at [www.cslawpolicy.com](http://www.cslawpolicy.com)

A subscription to the Contaminated Sites Law & Policy Directory is your key to vital information about the legal framework surrounding contaminated sites in selected jurisdictions around the world. Analysed and comprehensively annotated by leading authorities and contained in a fully searchable online database, it's the first legal resource of its type in the world and will deliver significant value to all those with an interest in contaminated site law and policy.

Bringing all the many complex pieces of contaminated site law & policy together in one place

## CONTAMINATED SITES LAW&POLICY DIRECTORY

The Contaminated Sites Law & Policy Directory is the single source for information about the legal framework surrounding a complex, 21st century issue. Legal advisors, policy makers, industries, academics and anyone with an interest in contaminated sites will benefit from this unique legal resource.

The information provided is the result of a comprehensive analysis by leading authorities of the regulatory processes and responsibility allocation relating to contaminated sites.

Delivered via the use of a standard template to enable comparison between jurisdictions, the summaries are designed to provide the reader with a clear understanding of the legislation, guidelines and other documentation and government policies that underlie the approaches taken by authorities in addressing the issue of contaminated sites management. The summaries will be reviewed for currency on an annual basis.

Whilst initially providing information pertaining to Australia, the website will evolve to include selected jurisdictions in the EU, US, Canada and the Asia Pacific region.

### About CRC CARE

CRC CARE is an Australian research and development organisation providing cutting edge technologies and knowledge in assessing, preventing and remediating contamination of soil, water and air.

CRC CARE was established under the Australian Government's Cooperative Research Centre Program in 2005 to bring together Australian and international expertise in science, industry and government in a partnership for the development, commercialisation and extension of advanced technologies and methods.

CRC CARE's approach brings together universities, regulatory authorities, mining, petroleum and agricultural industries, venture capitalists, environment consultants and suppliers to work collaboratively on vital contamination issues and sites around the world.
